

**Team Number:** 19

**Written:** 18<sup>th</sup> October 2025

**Last Reviewed:** 9<sup>th</sup> December 2025

**GOALS:** What are our team goals for this project? What do we want to accomplish? What skills do we want to develop or refine?

We wish to develop an application following the project brief that meets our team definition of done.

**We have defined our definition of 'done' as the follows:**

- The application is working, and does not crash nor reach any error condition during runtime.
- The application meets the brief specification, focusing on core Computer Science concepts.
- The application meets our personal specifications.
- The application meets our supervisor feedback.
- We have successfully followed our project management process and received feedback from our supervisor throughout the design and development process.

We have discussed initial project ideas, settling on an educational programming application for mobile, demonstrating core Computer Science concepts.

**We look to develop our technical skills encompassing professional software development, and our soft skills encompassing agile project management, and the scrum framework. We have defined this in the following way:**

- We are going to set and keep regular team deadlines.
- We are going to chunk tasks into actionable tasks for our defined sprints.
- We are going to achieve the brief prior to the deadline so we have opportunity to review.
- We are going to consistently document and review our process.

**We have discussed and determined the following as our core project management tools:**

- We are going to utilise Discord as a team communication method, and GitHub as a version control management solution (with Git as the underlying version control software). Through GitHub organisations we are going to utilise the Kanban board.

**EXPECTATIONS:** What do we expect of one another in regard to attendance at meetings, participation, frequency of communication, the quality of work, etc.?

**Our expectations of each other are as follows:**

- We expect to be able to reach each other between our core 'business' hours – these are 9am to 5pm on Thursdays and Fridays.
- We expect that team members keep up with the main communication channels and notices on the team Discord server.
- We expect a minimum of 80% attendance to our weekly meeting schedule, with attendance over Discord where members are unable to be physically present.
- No more than two meetings in a row are to be missed.
- Team members are to reach out to team members that have not been in contact.
- We expect team members to provide notification where they are unable to engage or attend meetings, and not to go silent without alerting team members they will not be contactable for an extended period.
- We expect team members to complete tasks which they have agreed to, and to communicate where they are struggling in a timely manner.
- We expect that code should be commented, explaining functionality and identifying design decisions that are not self-evident.

**POLICIES & PROCEDURES:** What rules can we agree on to help us meet our goals and expectations?

**We have determined the following procedures to help team members meet expectations and achieve our team goals:**

- Where additional time is required for tasks, or deadlines aren't going to be met, members are expected to submit an informal request through Discord for support.
- The module dispute process is to be utilised for disagreements between team members.
- Team members are to follow the non-contact policy (detailed below).

**Non-Contact Policy**

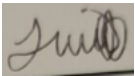

- If a team member is not communicating, team members are to reach out during the first week to investigate if the team member requires support.
- If a team member is not communicating for two weeks, team members are to issue a group warning in the team Discord, and by university email, that the absence is to be discussed.
- If a team member has not been communicating for one week after a group warning, the absence is to be discussed at the next team meeting and escalated to the team supervisor.

**CONSEQUENCES:** How will we address non-performance in regard to these goals, expectations, policies and procedures?

**We have discussed and agreed the following consequence outline:**

- Where task, deadlines, and time management expectations are not met – individual peer reviews will be adjusted to reflect this.
- Where team members do not attend meetings or communicate effectively, the non-contact policy will be followed (as detailed in the previous section).

We share these goals and expectations, and agree to these policies, procedures, and consequences.

**James Whittingham – signed 07.11.25**

**Daniel Newby – signed 07.11.25**

**Borisz Kantor – signed 07.11.25**

**Shawn Cris Martin – signed 27.11.25**

**Favour Igboko – signed 08.12.25**

**Munashe Shongedza – signed 09.12.25**
